The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/759,491

Applicant(s)

SEO, DONG WOOG

Examiner

Noah C. Hawk

Art Unit

3636

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 is/are pending in the application.
- 4a) Of the above claim(s) 10, 18, 19 and 28-30 is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-9, 11-17 and 20-27 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☒ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 1/15/04.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: ____.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: Group I – Figures 6-9, Group II – Figures 10-13. The species are independent or distinct because they would require a different technical search.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-6, 11-14, 16, 20-26, 29 and 30 are deemed generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. During a telephone conversation with Jun Jeon on June 15, 2007 a provisional election was made without traverse to prosecute the invention of Group 1, claims 1-9,

Art Unit: 3636

11-17 and 20-27. Affirmation of this election must be made by applicant in replying to this Office action. Claims 10, 18, 19, and 28-30 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Specification

3. The disclosure is objected to because of the following informalities: on page 12, line 26 of the specification, the phrase "is formed form" should be "is formed from".

Appropriate correction is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-5, 11, and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Park et al. in US Publication 2002/0074032 in view of Chiu in US Patent 5062178. Park teaches a collapsible canopy frame having a plurality of elongated side poles (37) having a side and an end and a plurality of wheel assemblies (39). Park fails to teach that the wheel assemblies have a mounting post. Chiu teaches a wheel assembly having a wheel (1) and a mounting post (2) extending transverse to the pole (4) on which it is supported. Chiu further teaches that the wheel assembly is

Art Unit: 3636

removably supported on the pole (the fact that the wheel is not integral to the pole is sufficient to indicate removability), that the mounting post extends through the side of the pole (through hole 411), that the assembly further comprises a bracket comprising a foot bracket (3), the bracket having an opening (in 35) aligned with an opening (411) in the pole, that the mounting post is removably secured in the bracket (the fact that the mounting post is not integral to the bracket is sufficient to indicate removability). Chiu further teaches that the foot bracket comprises a first side surface (33) and a second side surface (A), the first side surface having a first opening (31) therethrough, receiving the mounting post (Best seen in Figure 4) and including at least one resilient tongue (32) which engages a recess (21) in the mounting post. It would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Park et al. by using an assembly as taught by Chiu to attach a wheel to each of the poles of the canopy device in order to provide a removable wheel assembly for the user.

Chiu, Figure 3A

6. Claims 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Park et al. in US Publication 2002/0074032 in view of Chiu in US Patent 5062178. Park teaches a collapsible canopy frame having a plurality of elongated side poles (37) having a side and an end and a plurality of wheel assemblies (39) at the ends of the poles. Park fails to teach that the wheel assemblies have a mounting post. Chiu teaches a wheel assembly having a wheel (1) and a mounting post (2) extending transverse to and through the side (through hole 411) of the pole (4) on which it is supported. Chiu teaches a bracket (3) mounted at the end of each pole comprising an opening (31) aligned with an opening (411) in the pole. Chiu further teaches that the wheel assembly is removably supported on the pole (the fact that the wheel is not integral to the pole is sufficient to indicate removability), that a portion of each bracket is disposed in the interior of the pole (Best seen in Figure 4) and that the mounting post is removably

Art Unit: 3636

secured to the bracket (the fact that the mounting post is not integral to the bracket is sufficient to indicate removability). It would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Park et al. by using an assembly as taught by Chiu to attach a wheel to each of the poles of the canopy device in order to provide a removable wheel assembly for the user.

Allowable Subject Matter

7. Claims 6-9, 12, 17 and 24-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schultz and Haydock teach wheel assemblies.

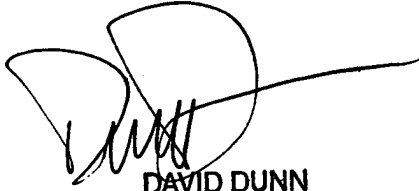

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Noah C. Hawk whose telephone number is 571-272-1480. The examiner can normally be reached on M-F 9am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Dunn can be reached on 571-272-6670. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
